

### **Molly McGinty**

Molly is an Employment Specialist with TotalLink to Community. She started with TotalLink in Fall 2021 co-facilitating the Body, Heart, & Mind program, and became an Employment Specialist in March 2022. Molly strives to help others find their passions and motivate them to fulfill their goals.

Molly graduated from Colorado State University, where she received a BS in Equine and Biomedical Science with concentrations in neuroscience and reproduction. She spent many years as a volunteer and trainer at an equine-assisted therapy and therapeutic riding program in Fort Collins, Colorado. There she was able to combine her two greatest passions, horses and helping others develop new skills and reach their potential. It was during this time that she was able to work with people from all walks of life, including children and adults with disabilities, veterans, and young women with a troubled past. It was a wonderful experience that led her to discover the joy of helping others find themselves and have something to be proud of.

Molly moved to Illinois in 2018, and has spent four years working as a paraprofessional with the Kildeer Countryside School District at both the elementary and middle school levels. She loves sports, spending time with family, being outdoors, and being with her dog Riley and horse Shazam.
